Deciding What to Work On

There are all kinds of options in MobyMax, but which ones should your child be focusing on?

The first step is to check the Assignments tab — if your child's teacher has assigned one or more lessons, those should be the top priority.

Second, under the library tab you will see all the modules available to your student. Look for the small black boxes with the daily time expectations for assigned subjects. Once your student has completed all the required minutes they may choose from any of the other topics that interest them including:

- Science
- Social Studies
- Fluency Board Games

The Parent's Guide for Using Moby from Home Lessons in MobyMax

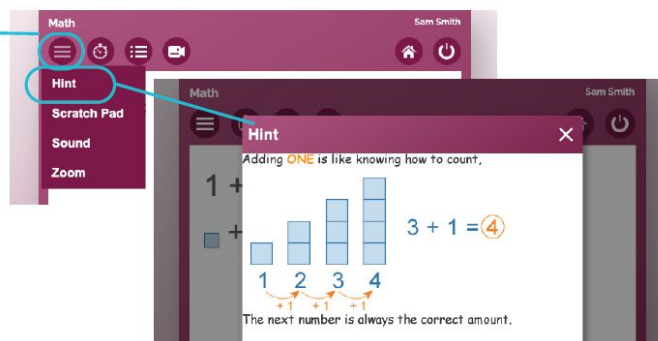

Once your child has launched a lesson or placement test, they're pretty much good to go! Most lessons start with a brief instructional video before progressing to increasingly more challenging questions to test your knowledge.

Audio is an important part of the Moby experience. Make sure your volume is turned up or put on a set of headphones. If you aren't hearing everything, check the sound settings in the drop-down menu.

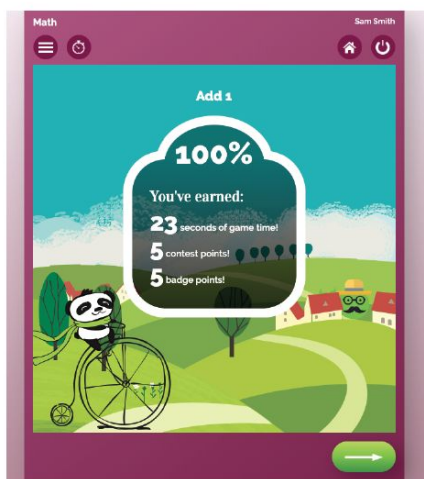

For more complicated problems, feel free to use the Moby scratch pad to work through multiple steps.

If your child is stuck on a concept, grab a hint here or click the video icon to watch the introduction again for a refresher.

Keep an eye on the progress bar—this will show you how far your child has come and how many problems they have left. If they need to step away from their lesson, we'll automatically save their progress so they can pick up right where they left off the next time they launch the subject.

When the lesson is complete, your child will see a screen like this with their results and all the rewards they earned along the way.
